

BUILD ONE ZAMBIA

Registration & Ward-Level Partnerships

Registration

Build One Zambia exists to unite Zambians, Americans, Chinese, and people from across the world — forging lasting people-to-people and economic ties between our nation and the global community, one ward at a time.

We connect Zambia's 1,800 wards with over 7,000 U.S. local chambers of commerce, a growing network of Chinese business associations, and international trade partners from every corner of the globe. Together, this powerful network drives economic growth, expands opportunity, and strengthens Zambia's place in the world. Through these strategic partnerships, every Zambian ward gains a direct link to the United States, China, and beyond — unlocking export markets, attracting investment, and empowering local entrepreneurs to compete on a global stage.

Each ward is paired with international partners to help Zambian farmers, manufacturers, and entrepreneurs:

- Export products to U.S., Chinese, and global markets
- Connect with international investors from America, China, and around the world to expand their market reach
- Navigate trade regulations across multiple countries and build sustainable, long-term relationships

This is our vision: a Zambia fully connected to the world — to America, to China, and to every nation willing to grow with us. Choose your registration type below to become part of this movement.
